

# GOKULESWARAN S

Network Engineer - NOC Engineer - Telecom Network Engineer

Chennai - +91 9342438046 - [eswarangokul45@gmail.com](mailto:eswarangokul45@gmail.com) - [LinkedIn](#) - [GitHub](#)

## PROFESSIONAL SUMMARY

Fresh ECE graduate (CGPA 8.66) with Cisco CCNA certification and strong hands-on skills in TCP/IP networking, VLANs, subnetting, ACLs, DNS, DHCP, routing and switching, and network security fundamentals. Designed and simulated enterprise networks using Cisco Packet Tracer. Familiar with network monitoring, incident management, and root cause analysis. RF/Wireless internship and dual 5G certifications (Qualcomm, TelcoLearn) make me suitable for both IT networking and Telecom infrastructure roles. Immediate joiner, open to 24x7 shifts.

## SKILLS

**Networking:** TCP/IP, OSI Model, IPv4/IPv6, Subnetting, VLANs, DHCP, DNS, NAT, Static Routing, OSPF (Fundamentals), LAN, WAN, Wireless Basics

**Network Security:** Firewall Fundamentals, ACL, VPN, WAF, NAC, Proxy Servers, Security Policies, Threat Detection Basics

**Tools:** Cisco Packet Tracer, Wireshark, MATLAB, Linux Basics, VS Code, Git

**Network Operations:** Network Monitoring, Incident Management, Root Cause Analysis, Troubleshooting, Change Management

**Telecom / IoT:** RF Fundamentals, Antenna Characterization, Vector Network Analyzer (VNA), 5G Concepts, IIoT, Raspberry Pi Pico

**Programming:** Python, C, C++

**Languages:** Tamil (Native), English (Professional)

## PROJECTS

### Enterprise Network Design & Troubleshooting

*Tool: Cisco Packet Tracer*

- Designed a multi-segment enterprise network with VLANs, DHCP, subnetting, static routing, and inter-VLAN segmentation.
- Implemented ACL-based traffic filtering to enforce security policies and verified performance using ping and traceroute, confirming VLAN isolation and end-to-end connectivity.

### IIoT Tyre Monitoring System for Mining Dumpers

*Tool: Raspberry Pi Pico — Python*

- Built a real-time IIoT tyre pressure monitoring system with TKPH analysis and automated wireless threshold alerts.

## INTERNSHIPS

### RF & Microwave Engineering Intern — CESDCS

*May – June 2024*

- Measured antenna parameters including return loss, gain, VSWR, and radiation pattern using a Vector Network Analyzer (VNA).
- Developed strong RF fundamentals in satellite and wireless communication, applicable to telecom infrastructure, network operations, and wireless engineering roles.

## EDUCATION

### St. Joseph's College of Engineering

2022–2026

B.E. Electronics and Communication Engineering

CGPA: 8.66

### John Dewey Matric Hr. Sec. School

2021–2022

HSC: 91.17%

### The New John Dewey Matric Sec. School

2019–2020

SSLC: 85%

## CERTIFICATIONS

### CCNA: Introduction to Networks

Cisco Networking Academy

### Network Basics

Cisco Networking Academy

### Introduction to Internet of Things

NPTEL

### 5G for Everyone

Qualcomm

### 5G Deep Dive

TelcoLearn

### C, C++, Python

Coderz Academy

### MATLAB Self-Based Courses

MathWorks
